

RAM GANGRADE

SDET / QA Automation Engineer | 4+ yrs

gangraderam538@gmail.com | +91 74155 45448 | Indore, India | linkedin.com/in/ramgangrade | github.com/RamGangrade538

SUMMARY

SDET / QA Automation Engineer with 4+ years designing scalable test automation frameworks for Web, API, and Mobile applications. Expertise in Java, Selenium WebDriver, Playwright, Cypress, Appium, RestAssured, TestNG, JUnit, Cucumber, SQL, Jenkins, Docker, GitHub Actions, GitLab CI/CD, and Agile. Track record of reducing regression effort by 60%, improving automation coverage, optimizing CI/CD release pipelines, and delivering high-quality software across Healthcare, SaaS, FinTech, and GenAI domains.

SKILLS

Java, JavaScript, SQL, Selenium WebDriver, Playwright, Cypress, Appium, TestNG, JUnit, Cucumber (BDD), RestAssured, Postman, API Testing, Jenkins, GitHub Actions, GitLab CI/CD, Docker, Maven, Git, JMeter, BrowserStack, Sauce Labs, Page Object Model, Data-Driven Framework, Hybrid Framework, Agile, Scrum

WORK EXPERIENCE

Senior Automation Test Engineer (SDET)

Emorphis Technology - Jul 2024 - Present

- Designed, implemented, and maintained scalable test automation frameworks for server-side and client-side systems using Java, TestNG, and Selenium WebDriver.
- Set up and managed containerized test environments using Docker, automating test execution across multiple CI/CD pipelines in Jenkins, GitHub Actions, and GitLab CI.
- Optimized CI/CD pipeline reliability, troubleshooting and debugging pipeline failures to ensure seamless automated regression execution across weekly deployment cycles.
- Executed release-based validation, ensuring full compatibility and high availability across deployment cycles, improving build quality and reducing production defects by 15%.
- Enhanced automation coverage by 40%, reducing manual testing by 50% through end-to-end and system-level test plans.

Automation Test Engineer (SDET)

DevQAExpert Solution - Dec 2023 - Jun 2024

- Developed Cypress and Mocha framework for cross-browser end-to-end automation, reducing test effort by 40%.
- Built REST API test suites using RestAssured and Postman, improving API test reliability by 20%.
- Delivered a data-driven Selenium + TestNG framework in Java, halving regression cycle time.

Automation Test Engineer (QA)

Eminence Square - Apr 2023 - Nov 2023

- Designed and implemented a hybrid automation framework (Java + TestNG + Maven) with modular reusable components, enabling faster onboarding and maintainability.
- Implemented BDD automation using Cucumber and Gherkin, improving collaboration between QA engineers, developers, and business stakeholders.

QA Engineer

Vakratund Associate - Apr 2022 - Aug 2022

- Automated 40% of regression test cases using Selenium + Java.

- Executed functional, UI, and regression testing, reducing post-release defects by 10%.

EDUCATION

Bhopal School of Social Science — BBA
