SDET / QA Automation Engineer | 4+ yrs | Selenium, API ,Appium , Playwright | Java | CI/CD (Jenkins, Docker, GitHub Actions) | SaaS • Healthcare • FinTech

PROFILE SUMMARY

SDET / QA Automation Engineer with 4+ years of experience designing scalable automation frameworks for Web, API, and Mobile applications. Expertise in Java, Selenium WebDriver, Playwright, Cypress, Appium, RestAssured, TestNG, Cucumber, SQL, Jenkins, Docker, GitHub Actions, GitLab CI/CD, and Agile methodologies. Proven track record of reducing regression effort by 60%, improving automation coverage, accelerating release cycles, and delivering high-quality software across Healthcare, SaaS, FinTech, and GenAI domains.

PROFESSIONAL EXPERIENCE

Emorphis Technology – Senior Automation Test Engineer(SDET)

Jul 2024 – Present

- Designed and integrated **Jenkins, Docker, and GitHub Actions CI/CD pipelines**, reducing deployment time by **30%** and enabling automated regression execution.
- Enhanced **Selenium WebDriver + TestNG automation framework**, increasing automation coverage by **40%**, reducing manual testing by **50%**, and improving regression reliability.
- Collaborated with developers and DevOps teams to identify automation gaps, improving build quality and reducing production defects by **15%**.

DevQAExpert Solution – Automation Test Engineer(SDET)

Dec 2023 – Jun 2024

- Developed Cypress & Mocha framework for cross-browser automation, reducing test effort by 40%.
- Built REST API test suites using Postman & RestAssured, improving reliability by 20%.
- Delivered data-driven Selenium framework in Java, halving regression cycle time.

Eminence Square – Automation Test Engineer (QA)

Apr 2023 – Nov 2023

- Designed and implemented hybrid automation framework (Java + TestNG + Maven) with modular and reusable components, enabling faster onboarding and maintainability.
- Implemented **BDD automation using Cucumber and Gherkin**, improving collaboration between QA engineers, developers, and business stakeholders.

Vakratund Associate – QA Engineer

Apr 2022 – Aug 2022

- Automated 40% of regression test cases with Selenium + Java.
Executed functional, UI, and regression testing, reducing post-release defects by 10%.

Capitalways (Fintech) – Business Analyst

Jul 2016 – Jul 2018

- Requirement gathering, documentation (SRS, FRS), and client coordination. (Early career role)

TECHNICAL SKILLS

- Programming & DB: Java ,SQL, javascript
- Automation: Selenium WebDriver, Cypress, Playwright, Appium
- API Testing: Postman, RestAssured, API , Manual Testing
- Frameworks: TestNG, Cucumber (BDD), Data-Driven, POM ,Hybrid
- CI/CD & Tools: Jenkins, GitHub Actions, GitLab CI, Maven, Docker ,
- Performance Testing: JMeter(basics)
- Other Tools: Jira, Confluence, Sauce Labs
- Domains: Healthcare, SaaS, FinTech, GenAI , E commerce , Banking ,Enterprise

KEY PROJECTS

- CECB – Govt. Industry project from scratch .
- CareSync (Healthcare SaaS): Owned end-to-end QA, automated regression suite (Selenium + RestAssured + Jenkins CI), cut release cycle by 40%.
- Japa Health (HealthTech): Built Playwright (JS) automation for web testing; designed mobile test automation using Appium with UIAutomator and Android SDK, executed tests on real devices via BrowserStack, and integrated with GitLab CI/CD pipelines for fast cross-platform validation.
- OptumRx (Healthcare): Freelance QA Automation – migrated manual cases into Selenium+Maven framework, improving efficiency 50%.
- CARM (FinTech): Developed Cypress UI automation and RestAssured API tests, integrated with Docker-based CI/CD pipelines; implemented end-to-end workflow automation ensuring 95% stable test execution and deployment consistency.
- Atera (SaaS PSA): Implemented mobile and web automation using Appium with Appium GUI Server, leveraging ADB, Android Studio, and BrowserStack for parallel mobile execution; built CI/CD pipeline framework to improve test coverage by 50% and reduce UAT bugs by 15%.
- Huma (Mobile): Led mobile automation with Playwright for Android/iOS apps, integrating cloud device testing, ADB, SDK, and real device farm execution; optimized test execution through parallelization and CI/CD pipelines, improving mobile test accuracy by 20%.
- PayKickstart (SaaS): Converted manual test cases into Cypress + Mocha scripts, reducing test execution by 30%.
- Ash-Sheldon (GenAI): Developed Playwright-based automation to extract and structure large-scale data for database creation.

EDUCATION

BBA – Bhopal School of Social Science
